

### **After hours assistance is appreciated**

A couple of times in the last few years I have been working on documents in the evenings and have had some sort of technical issues with district technology. I have e-mailed **Jeffrey Jones** at that time, expecting to hear from him the next morning. However, I have been delighted to receive e-mails from Mr. Jones offering suggestions to the problem shortly after sending him my questions and well after "normal" business hours. I greatly appreciate his dedication and effort so that I can access the information I need to prepare for my students.
