

Protect Your Home

Smoke detectors save lives! Did you know that representatives with the Lexington Fire Department can come to your home, tell you about any fire hazards they see and install smoke detectors if needed? They can also help you develop an exit plan to use if there is a fire.

If you do not have a smoke detector, or if you are not sure that your smoke detector works, please call the Lexington Fire Department Community Education Program at (859) 231-5663. You can also request help at your family resource center, child care center or the Health Department. Both renters and home owners are eligible for assistance.

The Lexington Fire Department/Injury Free Coalition for Kids of Lexington Home Fire Inspection and Smoke Detector Installation Program is sponsored by the Lexington Fire Department, Injury Free Coalition for Kids of Lexington at Kentucky Children's Hospital, and SAFE KIDS Kentucky with funding from SAFE KIDS International/US Fire Administration.
