

Squires Elementary teacher **Ken Hobbs** has always enjoyed visits from previous students to hear about their successes or challenges as they grow into young adults. This year he has spent time with a high school freshman that he taught in second grade while the student is performing community service at our school. One Friday afternoon, just as Mr. Hobbs was ready to head home after a tiring day, the student arrived asking to play chess. Mr. Hobbs relented wearily and they played the game for two hours, during which the student said, “It’s nice to spend time with people who like me.”
