

Kudos

To **Paul Laurence Dunbar** students **Cynthia Lu** and **Samantha Wang**, who worked on summer research projects at Kentucky State University. They presented their research results in November at the annual meeting of the Kentucky Academy of Science in Louisville. Lu, a senior in the Math, Science & Technology Center program at Dunbar, won first place in the student paper competition in the Division of Anthropology and Sociology; Wang, a junior, took third place in the Division of Physiology and Biochemistry.
