

I am a floating custodian, and I worked at Garden Springs Elementary at the beginning of the school year. I had prostate cancer surgery on the 4th of March. When I came home, **Karen Addison** called and told me that she and some of the teachers and aides were going to fix my dinner and she would bring it to me every afternoon of the following week. She went out of her way to make sure I was all right and took her time and gas to bring my dinner every night that week. Also, that last day, the group of ladies from the cafe came to the house just to see how I was doing.
