

**Stacy Jones** goes above and beyond what I could ever expect of her. My daughter is in her special needs class, and when I send her to school, I feel as if I am sending her with her second mother. ... She has helped my child feel as if she is no different than any other student at Morton Middle School. ... Mrs. Jones helped my daughter try out for the basketball team and the track team and even talked to her after she didn't make the basketball team. She makes sure she gets to track practice every day. If there is a school dance and my daughter attends, Mrs. Jones tries to stay after school and attend the dance just to make sure she is OK. I have never met a teacher who is willing to spend so much of her own free time to help out a student. I truly feel that she cares about the education as well as the social skills my daughter receives at Morton.
