

Kim Walker is one of the best teachers I have met in the Fayette County district. ... I informed her that my daughter was having problems in math, and the very next day she began quizzing her on multiplication facts as she walked down the hallway passing Ms. Walker's room to get to her homeroom. When my daughter came home from school that day, she began telling me about her day -- how Ms. Walker quizzed her every time she saw her in the hall. Ms. Kim Walker also worked the after-school program and is currently taking classes for her master's, but somehow she manages to do so much for the children at Millcreek Elementary. The children at Millcreek just absolutely adore her and her intelligence, patience and wisdom and so much more, and so do I.
