

This year Fayette County had a rookie robotics team competing at the FIRST Robotics Boilermaker Regional in Purdue. **Jim Adams** of Dunbar High School worked tirelessly to make this happen. He took the team to visit the established Fort Thomas Highlands team on a Saturday in November, and he was with the FCPS kids every afternoon and each Saturday that they worked during their six-week “build season.” The robotics team’s success is largely attributed to the time, energy and effort that Jim put into providing this opportunity.
